

Members of the Connecticut General Assembly,

It's my understanding there is a bill going through the Connecticut General Assembly — SB 425: An Act Concerning Municipal Transparency, Efficiency, and Accountability — that would support programs like SeeClickFix in towns across Connecticut.

For what it's worth, I just want to say what an extraordinary service I think SeeClickFix is. I have used this little app several times over the past few years to report things like a particularly bad pothole, a burned out street lamp, and a vicious dog. In each case, I was amazed how promptly my town responded. It was like magic.

I hope you will support this bill so services like SeeClickFix can continue. SeeClickFix is a great idea. It's an app with real life impact, and it makes me love my town more!
